BUG REPORT – CLOSED

Turf Booking System | Developer Fix Verified by QA

Bug ID	BUG_TBS_001	**Project**	Turf Booking System
Module	Booking Management	**Bug Type**	Functional / Data Integrity
Reported Date	15-Jan-2026	**Severity**	Critical
Priority	High	**Environment**	Windows 11 / Chrome (version not recorded)
Developer Status	Fixed / Resolved	**QA Retest**	Passed
Final Bug Status	**Closed**	**Closure Date**	15-Jan-2026

1. Bug Title

System allows multiple users to book the same turf for the same date and time slot.

2. Description

The application has one turf that can be booked for different dates and time slots. Initially, the application allowed two different users to confirm bookings for the exact same date and time slot, resulting in duplicate bookings.

3. Preconditions

• Two different registered user accounts are available.

• Both users can log in successfully.

• The selected date and time slot are available before the first booking.

4. Steps to Reproduce (Original Defect)

Step	Action
1	Log in using User A's account.
2	Open the turf booking page.
3	Select 10-Nov-2026 and the 6:00 PM–7:00 PM time slot.
4	Confirm User A's booking.
5	Log out and log in using User B's account.
6	Select the same date and time slot.
7	Attempt to confirm User B's booking.

5. Test Data

Field	Value
User A	userA@gmail.com (sample test account)
User B	userB@gmail.com (sample test account)
Turf	Single turf
Date	10-Nov-2026
Time slot	6:00 PM–7:00 PM

6. Expected Result

The system should allow only one confirmed booking for the same turf, date, and time slot. A second user attempting to book the occupied slot should be prevented from confirming the booking.

7. Actual Result Before Fix

The application allowed User B to confirm the same turf, date, and time slot already booked by User A. Both users received successful booking confirmations.

8. Developer Resolution

Item	Details
Developer update	Developer confirmed that the defect was fixed.
Fix description	Booking validation was implemented to prevent duplicate bookings.
Root cause	Missing duplicate-booking validation.
Fix build	Not specified
Fix date	15-Jan-2026

9. QA Retesting – After Fix

QA executed the original duplicate-booking scenario again after the developer's fix. The retest passed: the duplicate booking issue no longer occurred during the reported test.

Retest step	Expected result	Actual result	Status
User A books a date/time slot; User B attempts the same slot	Second booking is rejected	Duplicate booking was prevented during retest	**PASS**

10. Final QA Verification

Verification field	Result
Retest outcome	**Passed**
QA confirmation	The reported defect did not reproduce after the developer's fix.
Regression testing	Not confirmed as performed; separate regression checks should be documented if executed.
Final bug status	**CLOSED**
Closed by	QA Tester
Closure date	15-Jan-2026

11. Closure Remarks

The developer fixed the duplicate booking defect. QA retested the reported scenario and confirmed that the same turf, date, and time slot could not be booked by a second user during retesting. The retest result is PASS; therefore, BUG_TBS_001 is marked CLOSED.
