QA Test Cases & Execution Results

Total test cases: 38 | PASS: 26 | FAIL: 12 | Pass rate: 68.4%

User Registration

ID	Test Scenario	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status	Remarks	Priority
TC_001	Register with valid details	Registration page is open.	1. Enter name 2. Enter email 3. Enter password 4. Click Register	Name: Saloni Email: saloni@gmail.com Password: pass123	User should be registered successfully and redirected to the Login page.	User registered successfully and redirected to the Login page.	PASS	Working as expected	High
TC_002	Register using an existing email	An account with the email already exists.	Enter the previously registered email and complete the registration form.	saloni@gmail.com	System should display 'Email already exists' message displayed.	'Email already exists' message displayed.	PASS	Duplicate registration prevented	High
TC_003	Register with empty fields	Registration page is open.	Leave all fields empty and click Register.	Name: blank Email: blank Password: blank	Required-field validation messages should be displayed.	Validation messages displayed.	PASS	Required-field validation working	Medium
TC_004	Register with invalid email format	Registration page is open.	Enter a name, invalid email, and password; click Register.	Name: Saloni Email: salonigmail.com Password: pass123	System should reject the invalid email and display a validation message.	Invalid email was accepted and the registration request proceeded.	FAIL	Sample defect: invalid email format is not validated. Verify in application.	High
TC_005	Enter special characters in name	Registration page is open.	Enter special characters in the name field and submit the form.	Name: S@loni123 Email: saloni.test@gmail.com Password: pass123	Name field should accept only permitted alphabetic characters (and spaces, if allowed).	Special characters and numbers were accepted in the name field.	FAIL	Sample defect: name field accepts unsupported characters. Verify business rule.	Medium
TC_006	Register with password below minimum length	Registration page is open.	Enter valid name and email; enter a short password; click Register.	Name: Saloni Email: saloni.short@gmail.com Password: 123	System should reject a password below the configured minimum length.	Short password was accepted and account registration proceeded.	FAIL	Sample defect: minimum password length is not enforced. Confirm configured rule.	High

Login

ID	Test Scenario	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status	Remarks	Priority
TC_007	Login as a user	A valid user account exists.	Enter valid user credentials and click Login.	Email: saloni@gmail.com Password: pass123	User should log in successfully and navigate to the Booking page.	Login successful; user redirected to Booking page.	PASS	User redirected correctly	High
TC_008	Login as an admin	A valid admin account exists.	Enter valid admin credentials and click Login.	Email: admin@gmail.com Password: admin123	Admin should log in successfully and navigate to Admin Dashboard.	Admin Dashboard opened.	PASS	Working correctly	High
TC_009	Login with invalid password	A valid user account exists.	Enter valid email and incorrect password; click Login.	Email: saloni@gmail.com Password: wrong123	Login should fail and an error message should be displayed.	Error message displayed.	PASS	Invalid password handled correctly	High

ID	Test Scenario	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status	Remarks	Priority
TC_010	Login with unregistered email	Login page is open.	Enter an unregistered email and a password; click Login.	Email: unknown@gmail.com Password: pass123	Login should fail and display 'Invalid email or password'.	Error message displayed.	PASS	Unregistered email handled correctly	High
TC_011	Submit empty credentials	Login page is open.	Click Login without entering email or password.	Email: blank Password: blank	Validation or error messages should be displayed.	Error displayed.	PASS	Validation working correctly	Medium
TC_012	Access protected booking page without login	User is logged out.	Enter the protected booking-page URL directly in the browser.	URL: protected booking page	System should redirect the user to Login or deny access.	Booking page opened without authentication.	FAIL	Sample defect: protected page is accessible without login. Verify in application.	Critical

Slot Management

ID	Test Scenario	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status	Remarks	Priority
TC_013	View available slots	User is logged in.	Open the Booking page.	N/A	All available time slots should be displayed.	Available slots displayed.	PASS	API working	Medium
TC_014	Select an available slot	User is logged in and slots are available.	Click the Select button for an available slot.	Slot ID: 2	Selected slot should be highlighted or otherwise shown as selected.	Slot selected.	PASS	Selection successful	Medium
TC_015	No slots available	No slots are available for the selected date.	Open the Booking page for that date.	Date with no available slots	'No Slots Available' message should be displayed.	'No Slots Available' message displayed.	PASS	Handled correctly	Medium
TC_016	Unavailable slot is selectable	A slot is already booked for the selected date.	Open the booking page and attempt to select the occupied slot.	Booked slot for selected date	System should prevent selection/booking of the occupied slot.	Occupied slot remained selectable and could proceed to booking.	FAIL	Sample defect: unavailable slot is not disabled. Verify in application.	High

Booking

ID	Test Scenario	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status	Remarks	Priority
TC_017	Book a slot successfully	User is logged in; selected slot is available.	Select slot, select date, complete the displayed payment step, and confirm booking.	Slot: 1 Date: 25-Jun-2026	Booking should be created successfully.	Booking successful; booking stored in database.	PASS	Booking stored in database	High
TC_018	Book an already-booked slot	The same turf, date, and time slot is already confirmed for another user.	Attempt to book the same turf, date, and time slot.	Same turf Date: 25-Jun-2026 Same time slot	Second booking should be rejected.	Error displayed; duplicate booking prevented.	PASS	Duplicate booking prevented	Critical
TC_019	Book without selecting a date	User is logged in and a slot is available.	Select a slot but leave the date empty; submit booking.	Date: blank Slot: 1	Validation message should indicate that date is required.	Date validation message displayed.	PASS	Date required	Medium
TC_020	Book without selecting a slot	User is logged in.	Select a date but do not select a slot; submit booking.	Date: 25-Jun-2026 Slot: blank	Validation message should indicate that a slot is required.	Slot validation message displayed.	PASS	Slot required	Medium
TC_021	Create booking with pending payment	User is logged in and selected slot is available.	Select a slot and date; use the pending-payment flow if supported; submit booking.	Payment status: PENDING	Booking should be stored with Pending payment status, if pending payment is an allowed state.	Booking saved with Pending payment status.	PASS	Working correctly	Medium
TC_022	Book same slot simultaneously from two accounts	Two users are logged in on separate sessions; same slot is initially available.	Submit booking for the same turf/date/time from both sessions at nearly the same time.	User A and User B Same date and time slot	Only one booking should be confirmed; the other request should be rejected.	Both requests received successful confirmations for the same slot.	FAIL	Sample defect: concurrent duplicate booking. Verify after fix; do not report if no longer reproducible.	Critical

ID	Test Scenario	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status	Remarks	Priority
TC_023	Book a date in the past	User is logged in.	Select a past date and an available time slot; submit booking.	Past date: 01-Jan-2025	System should reject booking for a past date.	Booking was created for the past date.	FAIL	Sample defect: past-date booking validation is missing. Verify in application.	High

My Bookings

ID	Test Scenario	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status	Remarks	Priority
TC_024	View booking history	User is logged in and has bookings.	Open My Bookings page.	Logged-in user ID	Only the logged-in user's bookings should be displayed.	Booking list displayed for the logged-in user.	PASS	Correct bookings loaded	Medium
TC_025	View bookings when none exist	A newly registered user has no bookings.	Open My Bookings page.	New user account	An appropriate empty-state message should be displayed.	'No bookings found' displayed.	PASS	Correct handling	Low
TC_026	View another user's booking by changing URL/ID	User A is logged in; User B has a booking.	Attempt to open User B's booking using its booking ID or URL.	User B booking ID	System should deny access to another user's booking details.	User A could view User B's booking details.	FAIL	Sample defect: booking ownership authorization is missing. Verify in application.	Critical

Cancel Booking

ID	Test Scenario	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status	Remarks	Priority
TC_027	Cancel a future booking	A future confirmed booking exists for the logged-in user.	Open My Bookings and click Cancel for the future booking.	Booking ID: 1	Booking status should change to CANCELLED.	Booking cancelled; status changed to CANCELLED.	PASS	Working correctly	High
TC_028	Cancel an already-cancelled booking	The booking is already cancelled.	Click Cancel again for the same booking.	Booking ID: 1	System should prevent repeated cancellation and display an appropriate message.	Already cancelled message/status displayed.	PASS	Duplicate cancellation prevented	Medium
TC_029	Cancel a past booking	A booking date has passed.	Open My Bookings and inspect the past booking.	Past booking	Cancel action should be disabled or unavailable; booking should be marked Expired if that is the defined rule.	Expired label displayed; cancellation unavailable.	PASS	Business rule implemented	Medium
TC_030	Cancelled slot becomes available again	A confirmed booking exists and can be cancelled.	Cancel the booking, then check the same date/time slot from another user account.	Booking ID: 1 Same date/time slot	After cancellation, the slot should become available for a new booking.	Slot remained unavailable after the original booking was cancelled.	FAIL	Sample defect: cancelled slot is not released. Verify in application.	High

Payment

ID	Test Scenario	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status	Remarks	Priority
TC_031	Payment module status for successful booking	A booking is ready for payment and payment flow is available.	Complete the payment flow and inspect booking/payment status.	Payment: successful	Payment status should be PAID and booking should reflect the expected confirmed state.	Payment status shown as PAID for successful payment.	PASS	Payment status recorded	High
TC_032	Payment failure should not mark booking as paid	A booking is awaiting payment and a payment failure can be simulated.	Trigger/submit a failed payment and inspect the booking status.	Payment result: failed	Payment should not be marked PAID; user should receive a failure message or retry option.	Payment status changed to PAID even though payment failed.	FAIL	Sample defect: failed payment is incorrectly recorded as paid. Verify payment integration/flow.	Critical
TC_033	Refresh or resubmit payment action	A payment request has already been completed for a booking.	Refresh the result page or submit the payment action again.	Existing booking/payment reference	System should not create a duplicate payment transaction.	A second payment record was created for the same booking.	FAIL	Sample defect: duplicate payment submission is not prevented. Verify in application.	High

Admin Dashboard

ID	Test Scenario	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status	Remarks	Priority
TC_034	View all bookings	Admin is logged in.	Open Admin Dashboard.	Existing bookings	All bookings should be displayed to the admin.	Bookings displayed.	PASS	Working correctly	High
TC_035	View booking statistics	Bookings with different statuses exist.	Open Admin Dashboard and inspect statistics.	Total, Paid, Pending counts	Total, Paid, and Pending counts should be displayed accurately.	Counts displayed correctly.	PASS	Statistics correct	Medium
TC_036	Cancelled bookings excluded from Paid/Pending counts	At least one booking is cancelled.	Refresh Admin Dashboard and inspect counts.	Cancelled booking	Paid and Pending counts should exclude cancelled bookings, according to the stated dashboard rule.	Counts updated; cancelled booking excluded.	PASS	Business logic correct	Medium
TC_037	Booking status displayed	Admin Dashboard is open and bookings exist.	View booking cards or booking list.	CONFIRMED / CANCELLED	Each booking should display its correct status.	Booking status displayed.	PASS	Working correctly	Medium
TC_038	Non-admin user accesses Admin Dashboard	A normal user is logged in.	Enter the Admin Dashboard URL directly.	Normal user account	System should deny access or redirect to an authorized page.	Admin Dashboard opened for a normal user.	FAIL	Sample defect: admin authorization is not enforced. Verify in application.	Critical
